Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments filed 12/30/2005 have been fully considered but they are not persuasive. Because: In response to applicants remark recitation "Although the Examiner has applied both the Datek and Newsletter references against the claims, in the initial office action only each of the entire documents was cited and in the final office action only a portion of the claims were addressed.

Applicant failed to point out what portion of the claim is not addressed.

In response to applicant's argument "the Examiner has provided no motivation to combine the applied art..." that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, See office action page 3 line 5 "to allow investor to fill up a mutual fund application form online and invest easy way".

In response to applicants remark recitation "A general review of the invention may be helpful to the Examiner, as there is crucial claim language the Examiner has appeared to overlook. ..."

In response to applicant's argument "A general review of the invention may be helpful to the Examiner, as there is crucial claim language the Examiner has appeared to overlook. ..." that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., features which are in background of invention, Abstract such as: security or option, pre-filled, research service) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicants remark recitation "A minimum, however, the Applicant ... addressed", see the followings: Regarding the following limitation "retrieving from a service provider information regarding a specific security, wherein the information includes a representation of a link to an online brokerage service; actuating the representation, thereby retrieving an order form for the specific security from the online brokerage service. See the detail as follows,

www.datek.com (datek URL) is an online trading website and well known (see page 1a of 23 of prior art submitted 1/13/2005) which is accessible using Internet by typing the URL in browser's address field or clicking on the URL. When the URL is entered (go button or search button). The browser retrieves the datek web page with datek's home page information, which enables the user interaction with the resources on the web page. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to open a browser and open the datek website and obtain (retrieve) trading information provided by datek (service provider).

Examiner used the Wayback Machine to retrieve prior art datek WebPages and retrieved, prior art, pages for Datek Online, which is related to this invention. The datek home page has couple of icons or buttons ("New Account", "Info Desk", "customer login", etc), which are URL links to other webpages or other websites for retrieving more information. For example, page 3 "New Account" button represents a link to new page (New Account - page 4/23) which is a URL for page 4 www.datek.com/Accounts/index.html, by clicking on (actuating) "New Account button, page 4 is retrieved, in order to see the URL, examiner uses the mouse right button and by clicking it opens a menu and from menu select property, which shows the URL link. Similarly, "customer login" should go to customer logging (user id /password) and account (see 2/23). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to configure the button to link to any webpage or website represented by for retrieving any information, form (see page 2 "Fill out the online form and get free real-time quote How about right now?) retrieves page 6/23, retrieving Express Order Entry Service (see page 12), brokerage site, etc. Page 84/109 Datek, prior art, shows icon for broker other than Datek such as: E-Trade and mutual fund Magellan (which is a security) see button "3-star site Magellan", Page 106/109 shows more funds, and page 104/105 shows more brokers links. Page 14/23 shows that "What You Can Trade With Datek Online" that user can trade stocks using datek and when a security such as stock is purchased a stock certificate is send to the purchaser (page 13/23), which implies it is a specific security (stock). Page 4/23 shows link to application form. Pages (8-11 of 23 show application entry form and submitting the from. Page 5/23 shows providing quotes. Page 8/23 shows a drop down menu "click on this arrow for choices", which fills up the field as it is selected. Page 104/105 shows a dropdown menu for brokers, link to stock tables, etc.

Regarding the following limitation "completing the order form; and submitting the order form to the brokerage service." See Mutual Fund Newsletter page ¼ "www.mutualfundsindia.com Update - 'Investing Made Easy' You can now fill up a mutual fund application form (completing the order form) ... next time when you decide to invest (purchase), you need to select only the schema name .. The desired form is generated ... for Kotak (specific fund)" and inherently submitted to process.
